ABOUT US

Glass Guard India Private Limited was founded in the year 2009 by Mr. Sachin Pachisia with the goal of processing all kinds of safety glass. Equipped with the latest technology, our plants at Nagpur, initially started processing of Tempered glass. For over a decades, we manufacture Laminated Glass, Toughened Glass, Automobile Glass, UPVC and DGU Glass, and many other products as well.

In 2020, we launched our first significant expansion, Glass Build Industry. A state of the art infrastructure equipped with the latest technology, our Nagpur plants manufactures more than 20 types of Glass and Glass Related Products. Glass Build Industry strives to process all forms of protective glass. We're dedicated to giving you the very best of safety, with an emphasis on consistency, customer support and professionalism, we are committed to providing you the absolute best of Quality. At an area of 2 lakh sq ft size the company manufactures more than 1000 sq mtr of glass every single day making it largest glass manufacture in Central India.

We're also proud to be Maharashtra's first BIS Certified (IS 2553 : Part 1 : 2018) & Saint Gobain Official Processor.

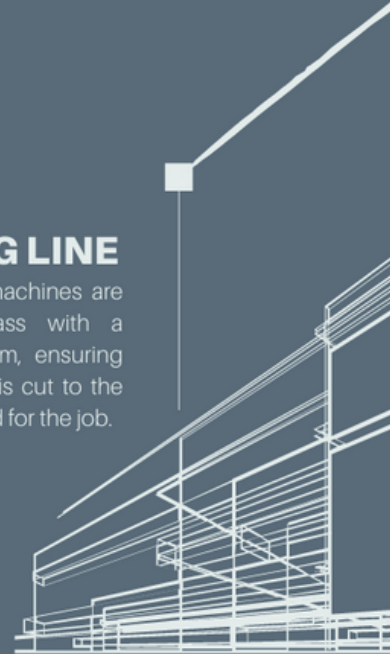

FACTORY AND MACHINES

Our factory features a range of state-of-the-art machines, including CNC glass cutting machines, tempering furnaces, laminating machines, and polishing machines. Our state-of-the-art machines are just one part of what makes our glass company factory unique. Our skilled and experienced technicians and engineers ensure that each product meets our high standards of quality and craftsmanship. We are proud to offer the most advanced glass processing machines in the industry, and we continue to invest in new technology to ensure that we remain at the forefront of the industry.

CNC CUTTING LINE

Our CNC glass cutting machines are capable of cutting glass with a precision of up to 0.1mm, ensuring that each piece of glass is cut to the exact dimensions required for the job.

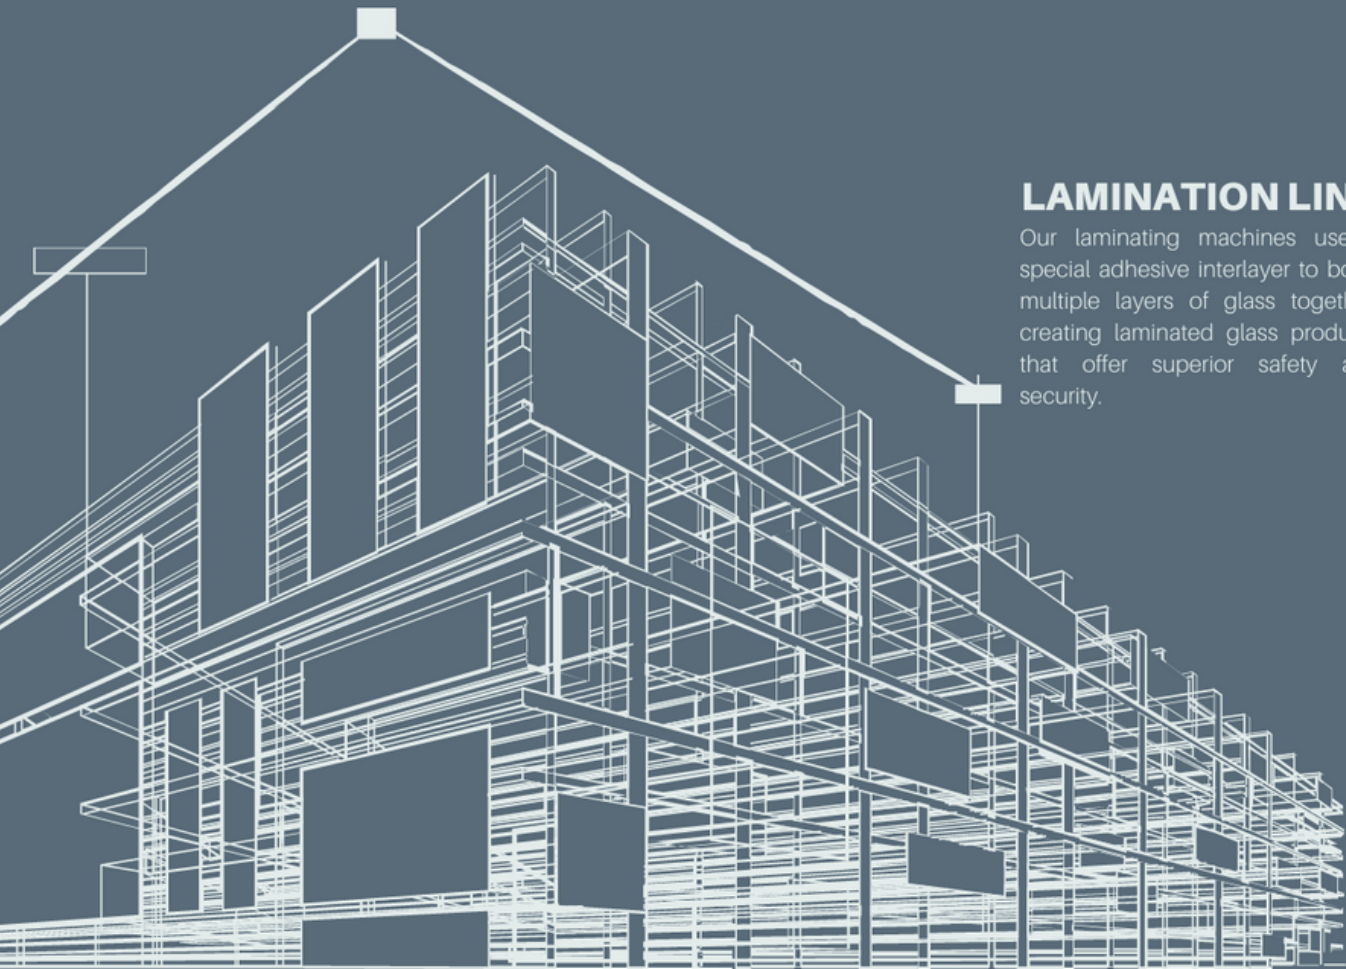

TEMPERING FURNACE

Our tempering furnaces use advanced technology to heat the glass to a specific temperature and then rapidly cool it, creating a strong, durable product that can withstand high impact and thermal shock.

LAMINATION LINE

Our laminating machines use a special adhesive interlayer to bond multiple layers of glass together, creating laminated glass products that offer superior safety and security.

WHY CHOOSE US?

Looking for a one-stop-shop for all your glass and glass-related products? Look no further than our company, the largest glass manufacturer in Central India with over 20 products to choose from.

Your **one stop** for all Glass and Glass related products.

More than **20 Products**

Largest Glass Manufacturer in Central India.

Been in Glass Industry past **30 years.**

First in City for Toughened Glass & DGU Glass

First in City who manufactures **JUMBO SIZE Toughened** glass

First in City for **PVB Laminated** Glass Manufacturer.

Modern and Latest **Technology** with skilled workers.

Exclusive Logo **partner** with **Saint Gobain**

Fast Delivery in City.

PRODUCTS

WE OFFER

Our glass company offers a wide range of high-quality glass products to meet all of your needs. Our products include toughened glass, laminated glass, double glazing unit glass, automobile glass, bus laminated glass, UPVC windows and doors, glass hardware, silicone sealants, glazing, and skylights.

TOUGHENED GLASS

LAMINATED GLASS

DOUBLE GLAZING UNIT GLASS

AUTOMOBILE GLASS

BUS LAMINATED GLASS

UPVC WINDOWS AND DOORS

GLASS HARDWARES

SILICONE SEALANTS

LAMINATED GLASS

We specialize in laminated glass, which is composed of two or more layers of glass that are bonded together with a layer of interlayer material. This interlayer provides additional strength and safety to the glass, making it highly resistant to breakage and penetration. We use only the highest quality materials and the latest laminated glass processing technologies to ensure that our products meet the strictest quality standards.

Increased **Security**

Reduced Emissions

Noise Insulation

Protections from adverse weather conditions

TOUGHENED GLASS

Toughened Glass has high withstanding capacity and is therefore suitable for uses where strength and thermal resistance are crucial. It is nearly five times stronger than annealed glass, and thrice as strong as heat strengthened glass. Even during breakage, its relatively small pieces reduce the chances of injury. We also specialize in toughened glass, which is up to five times stronger than standard glass and highly resistant to breakage. We use only the highest quality materials and the latest glass processing technologies to ensure that our products meet the strictest quality standards.

UPVC DOORS & WINDOWS

Glass Build Industry provides you World's Best uPVC Windows tested for over 25000 hours for extreme weather resistance, sound insulation & energy efficiency.

uPVC windows present an exquisite coming together of form and function. The profiles meet various requirements right from the budget apartments to palatial villas and commercial establishments – through structural design that can withstand rough weather conditions and wear & tear, ensuring Quality consistency and durability.

WHY UPVC?

Aesthetic

Looks matter the most. With this understanding, Prominace windows are adaptable to develop attractive designs, ranges and wooden finish laminated profiles.

Cost Savings

uPVC profiles save a lot of costs in terms of maintenance & saving energy when compared to Timber frames which are approximately 40% - 50% more expensive.

UV Resistant

Prominace windows offer 100% UV resistance with right amount of TiO₂, which helps in retaining whiteness against exposure to sun.

Durable

Prominace windows do not warp, twist or split. Impact modifiers in our profiles are treated with special additives, thereby making the material extremely long lasting.

Maintenance Free

Prominace windows are virtually dirt resistant and easy to maintain with normal soap water. It is very easy to install and require very less maintenance.

Termite & Sound Proof

Prominace windows are termite and corrosion resistant. Not only do they provide thermal insulation but also special sound insulation.
